Helix Compliance: Company Overview

Prepared for investor diligence, May 2026.

Helix Compliance builds AI triage software for bank compliance teams. The company was founded in 2024 in New York by Dana Whitfield and Marcus Lee. The product deploys inside the bank VPC and produces examiner-ready audit trails for every alert disposition.

Six regional banks are in production. The oldest customer, First Coast Bank, has run Helix for 14 months across 3 business lines. Average deployment time is 6 weeks from contract to first triage.

Regulatory Posture

Helix maintains a model risk management file per SR 11-7 guidance.

Every model decision retains its input evidence for 7 years.

SOC 2 Type II audit fieldwork began April 2026 with Prescient Assurance.
