Helix Compliance

AI copilots for bank compliance teams

Seed round, 2026

Confidential

Problem

Regional banks spend $2.4M per year on manual transaction review.

Alert false-positive rates run above 92% on legacy rules engines.

Compliance analysts burn 6 hours per suspicious-activity case.

Solution

An AI agent triages every alert with cited evidence from the case file.

Analysts review a ranked queue instead of a raw feed.

Every disposition is logged with its supporting documents for examiners.

Product

Alert triage queue, case workspace, and examiner-ready audit exports.

Deploys inside the bank VPC; no customer data leaves the tenant.

SOC 2 Type II audit in progress, expected Q3 2026.

Market

Financial crime compliance software TAM: $8.7B in 2026.

Bottoms-up: 4,200 US regional banks x $180K ACV = $756M serviceable market.

Consent orders and BSA enforcement grew 40% since 2024.

Business Model

Annual SaaS license, $150K average contract value.

Usage tiers by alert volume; implementation fee under 10% of ACV.

Land with transaction monitoring, expand to KYC refresh and sanctions.

Traction

ARR $410K across 6 bank customers as of May 2026.

Alert triage precision 94% measured against analyst ground truth.

Net revenue retention 118%; zero logo churn since launch.

Team

CEO Dana Whitfield: 11 years Chief Compliance Officer, First Coast Bank.

CTO Marcus Lee: 8 years ML infrastructure at Stripe.

9 FTEs total; all engineering in-house.

Competition

Legacy rules engines: NICE Actimize, Verafin. High false positives.

Horizontal AI tools lack examiner-ready audit trails.

Helix wins on cited evidence per disposition and VPC deployment.

Financials

Monthly burn $95K; 14 months runway at current plan.

Gross margin 71%; services under 8% of revenue.

2026 exit ARR plan: $1.2M.

The Ask

Raising $3M seed for 18 months of runway.

Use of funds: 10 bank pilots, SOC 2 completion, 4 engineering hires.

Committed: $750K from existing angels.
